

# *three streams*

The Homemakers Expo at the CTICC Cape Town is a exhibition that we attend annually.

It is the perfect platform to build and strengthen customer relationships, to present new products and re-introduce current products and give recipe ideas.

Every year we choose our tasting products carefully, to give visitors a taste experience that they won't forget and also use the opportunity to let visitors taste the difference between salmon and trout. We take pride in explaining our sustainability footprint, our processing procedures, where the fish come from, how we farm trout in Franschoek and the grow-out process in Katse Dame Lesotho.
